

Restoring the document package icon

Has your document package icon disappeared from your desktop? The icon will vanish when the document package is opened and then closed (instead of minimized).

To restore the document package icon to the desktop

1. Go to the **File** menu, and then select **Open – Document Package**. The *Open Document Package* dialog box opens.
2. Under *Directories*, go to the **Samples** folder.
3. Under *File Type*, select **Document Packages (*.NDP)**.
4. Select the document package you want to restore to your desktop.

5. Click **OK**. The document package icon reappears on the desktop.
