

Comparing plans, reports, and graphs

Comparing plans using NaviPlan's Comparison feature

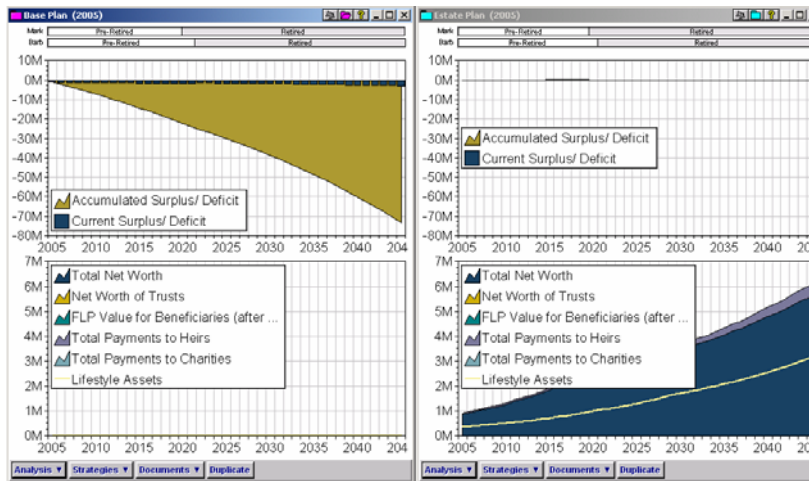

NaviPlan's *Comparison* feature streamlines your plan analysis tasks by letting you compare two plans, two reports, or two graphs side by side on your screen.

With your first plan, report, or graph displayed on the screen, click the **Comparison** button  in the upper right corner.

The *Select a Plan* dialog box opens. Choose which plan you would like to use for comparison, and then click **OK**.

You now have a side-by-side view of your two plans. This example shows a comparison of the Base Plan and the Estate Plan.

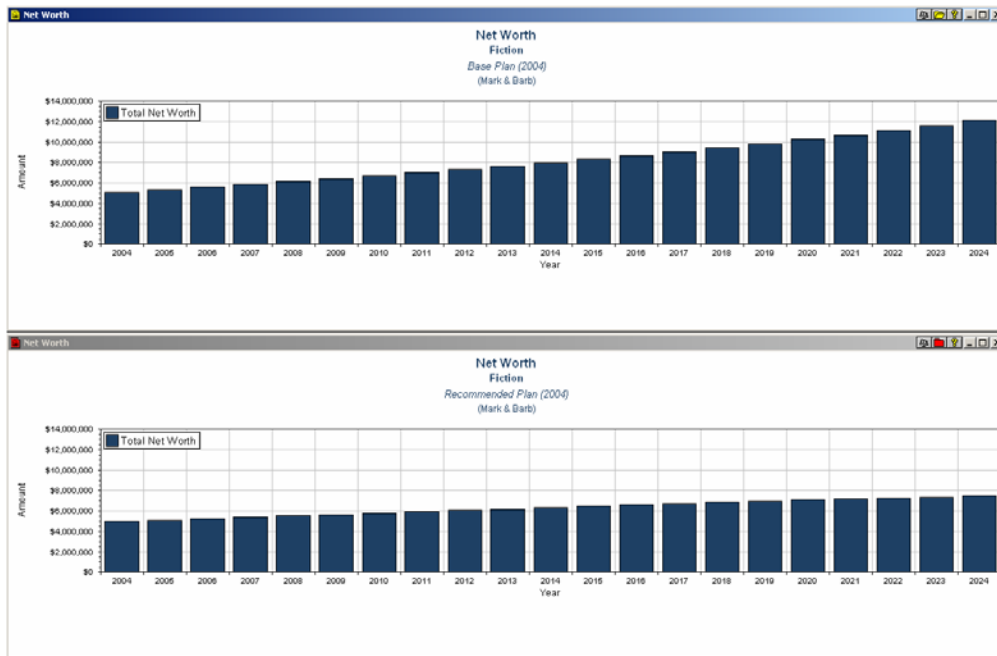

Comparing reports and graphs using the Tile Horizontal and Tile Vertical features

You can compare two or more different reports or graphs using the Tile Horizontal or Tile Vertical feature in NaviPlan.

Open two or more reports (or graphs) on the NaviPlan desktop. Go to the **Window** menu, and then select **Tile Horizontal** to view them one above the other, or **Tile Vertical** to view them side by side.
